

where water meets modern®

Blu Bathworks® is a Canadian modern bathware design house and manufacturer based in the heart of beautiful British Columbia. Founded in 2006 by designer Michael Gottschalk, Blu Bathworks' core design philosophy is to create contemporary architectural bathware that balances minimalistic forms with sustainable functionality. Blu Bathworks continues to grow from collaborations with established designers and premium factories in Europe to achieve a high level in both aesthetics and design structure.

Being the complete modern bathware solution, Blu Bathworks offers a wonderful range of rich and unique products that are fully certified in the North American market. Collections include bathtubs, shower bases, basins, countertops, tapware, shower systems, toilets + bidets, and furniture + accessories – all designed to work in harmony or as standalone pieces.

Blu Bathworks® **45° furniture collection** is Italian-crafted using quality, sustainable materials with the lowest formaldehyde emissions in the world. The collection is designed as a modular range of wall-mount vanities from 27½" to 71" wide, with coordinating blu-stone™ vanity tops and mirrors with LED lighting.

45° Design

The entire 45° furniture collection is characterized by a unique 45 degree design feature, which is achieved in 45° vanity frames by die cutting the wood material and delicately folding the pieces to create 45° joins on the two lower angles.

Soft-Close System

Promoting a minimalist, handle-free aesthetic, all 45° vanities feature a recessed finger pull channel to easily open the drawer, while Hettich technology is incorporated to provide a smooth, soft-close operation every time.

Drawer Organization

To facilitate bathroom organization, each 45° vanity is equipped with protective non-slip mats to prevent items from moving or sliding within the drawer, dividers and organizers such as - storage compartments, bins & cosmetic holders to provide storage at your fingertips.

LED Lighting

An LED perimeter light, subtly positioned behind the frosted edging, is standard with each 45° mirror - emitting a soft glow (color temperature: 4200K) that also provides a smart night light option. Lighting is operated by a discreet ¼" touch sensor switch, located on the mirror face.

Design Options

45° collection offers two vanity design options: FULL and UP vanity design.

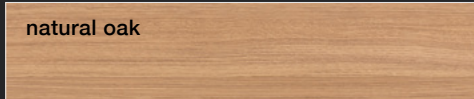

FULL: vanity design that features a slim inner drawer within to provide quick and easy access to smaller items, while facilitating a clean and minimalist look externally.

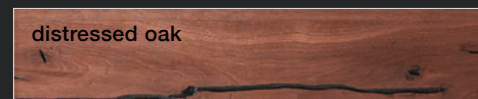

UP: vanity design that features a single drawer with an open bottom shelf to store and display towels and other toiletries.

Vanity / Mirror Frame: Available in a choice of Natural Oak or White Matte lacquer finish.

Vanity Drawer Front: Available in a choice of Vintage Oak finish as standard or Distressed Oak finish by special request. The wood front is a natural product, meaning no two panels are the same. Variations in color, vein, or finish are considered part of the wood's value and craftsmanship.

Blu Bathworks® **51 furniture collection** is a modular range of Italian-crafted vanities with six series ranging in width from 23½" to 71" with coordinating blu-stone™ vanity tops and choice of mirrors with LED lighting. Vanities available with an innovative Hard Surface Technology (HST) material that is exceptionally durable and highly resistant to scratches and chemicals.

HST Finish

51 vanities are designed with a choice of Hard Surface Technology (HST) finishes, that offer extraordinary technical performance in terms of exceptional durability, extremely high resistance to scratches and chemicals, in addition to a beautiful aesthetic and tactile wood grain effect.

Plumbing Clearance

The slim drawer within a drawer design of 51 vanities provides quick + easy access to smaller items, while facilitating a clean, minimalist look externally. Vanity drawers are designed to maximize storage space while separating stored items from drain pipes. Drawer organizers are optional.

Soft-Close System

Invoking a minimalist, handle-free aesthetic, 51 vanities feature an easy push/pull opening system – ensuring convenient opening with a gentle push anywhere along the drawer front, while Hettich technology is incorporated to provide a smooth, soft-close operation every time.

Mirror Design Options

51 collection offers two mirror design options: M1 box frame and M2 frameless

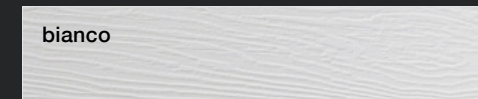

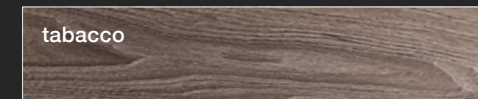

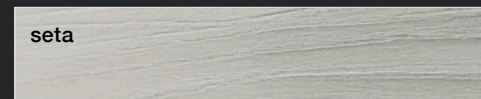

M1 box frame: M1 features vertical LED lighting and a box perimeter frame in white matte lacquer finish – which doubles as a stylish shelf for toiletries.

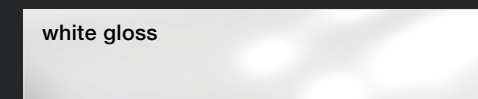

M2 frameless: M2 is a thin profile frameless mirror design with LED perimeter lighting.

Hard Surface Technology (HST): In addition to a natural and beautiful wood grain effect, HST finishes offer exceptional durability and high resistance to scratches.

Lacquered Finish: Modern and minimalistic, available in white matte as standard and white gloss.
